### SUPPLEMENTARY INFORMATION:

#### Background

This final rule corrects miscellaneous errors contained in final rules published on October 16, 2007 (72 FR 58473) and January 31, 2008 (73 FR 5709). This final rule also removes obsolete text published in a final rule on January 16, 1996 (61 FR 1109), and makes minor administrative changes to the NRC's regulations and corrects erroneous authority citations.

#### Rulemaking Procedure

Because these amendments constitute minor administrative changes to the NRC's regulations, the notice and comment provisions of the Administrative Procedure Act do not apply pursuant to 5 U.S.C. 553(b)(B). The amendments are effective upon publication in the **Federal Register**. Good cause exists under 5 U.S.C. 553(d) to dispense with the usual 30-day delay in the effective date of the final rule, because the amendments are of a minor and administrative nature dealing with administrative changes to the NRC's regulations due to errors published in other NRC rulemaking documents. These amendments do not require action by any person or entity regulated by the NRC, and the final rule does not change the substantive responsibilities of any person or entity regulated by the NRC.

#### Summary of Changes

Section 2.280—The NRC increased the receipts-based small business size standard from \$5 million to \$6.5 million to conform to the standard set by the Small Business Administration (SBA). This size standard reflects the most commonly used SBA size standard for

the nonmanufacturing industries. SBA adjusted this standard on January 23, 2002 (67 FR 3041) and on December 6, 2005 (70 FR 72577) to account for inflation. On August 10, 2007 (72 FR 44989), NRC amended 10 CFR 2.810(a)(1) and changed the size standard for a concern that provides a service for a concern not engaged in manufacturing but did not amend 10 CFR 2.810(b) to change the size standard for a small organization that is a not-for-profit organization which is independently owned and operated. This final rule updates the definition of a not-for-profit organization.

Sections 30.36(a), 40.42(a), and 70.38(a)—A final rule published on January 16, 1996 (61 FR 1109), extended certain types of licenses in effect at that time for an additional 5 years beyond their existing expiration date by revisions to §§ 30.36(a), 40.42(a), and 70.38(a). All of those licenses for which the expiration date was extended by this regulation have since expired. There is no longer a need for these provisions in the regulations. The text of these paragraphs reverts to the wording before the 1996 rulemaking.

Section 30.64—Removes reference to § 30.16.

The authority citation for part 31, and § 31.5 are revised to correct typographical errors.

Sections 32.12, 32.20, 32.25(c), and 32.29, were revised in a final rule published on October 16, 2007 (72 FR 58473), to change the reporting period for material transfers to annual, to change the content of the reports, and to remove the requirement to send copies to the Regional offices. Additionally, these sections were changed to reflect a reorganization within NRC. This administrative rule revises §§ 32.12, 32.20, 32.25(c), and 32.29 to restore the text as Originally stated in the October 16, 2007, rulemaking.

Section 32.15(d)(2)(ii) is revised to correct a typographical error.

Section 32.16 was revised in a final rule published on October 16, 2007 (72 FR 58473) to change the reporting period for material transfers to annual, to make minor changes to the content of the reports, to remove the requirement to send copies to the Regional offices, and to delete the reference to the deleted § 32.17. Additionally, the section was changed to reflect a reorganization within NRC. This

administrative rule revises § 32.16 to restore the text as Originally stated in the October 16, 2007, rulemaking.

Section 32.57—The term, “radium-226,” was added to the introductory text of § 32.57 and should have been added to § 32.57(b)(1), (b)(3), (b)(4), (c) and the introductory text or paragraphs (d) and (d)(1). This was an omission in the October 1, 2007 (72 FR 55863) rulemaking. This final rule adds the term “or radium-226” after americium-241 in these paragraphs.

Section 32.303—Removes reference to § 32.17.

Appendix E to part 50—Two paragraphs from Section I, and Sections IV.F.2.d through IV.F.2.h. were inadvertently removed from the Code of Federal Regulations in the implementation of the final rule published on August 28, 2007 (72 FR 49351). These sections are restored in this final rule.

The authority cites for parts 61 and 62 are revised to correct typographical errors.

#### **Environmental Impact: Categorical Exclusion**

The NRC has determined that this final rule is the type of action described in categorical exclusion 10 CFR 51.22(c)(2). Therefore, neither an environmental impact statement nor an environmental assessment has been prepared for this rule.

#### **Paperwork Reduction Act Statement**

This final rule does not contain information collection requirements and, therefore, is not subject to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

#### **Public Protection Notification**

The NRC may not conduct or sponsor, and a person is not required to respond to, a request for information or an information collection requirement unless the requesting document displays a currently valid OMB control number.

#### **Backfit Analysis**

The NRC has determined that the backfit rule does not apply to this final rule; therefore, a backfit analysis is not required for this final rule because these amendments are administrative in nature and do not involve any provisions that would impose backfits as defined in 10 CFR Chapter I.

#### **Congressional Review Act**

In accordance with the Congressional Review Act of 1996, the NRC has determined that this action is not a major rule and has verified this

determination with the Office of Information and Regulatory Affairs of OMB.

Appendix E to part 50—Emergency Planning and Preparedness for Production and Utilization Facilities

I. Introduction.

\* \* \* \* \*

The potential radiological hazards to the public associated with the operation of research and test reactors and fuel facilities licensed under 10 CFR parts 50 and 70 involve considerations different than those associated with nuclear power reactors. Consequently, the size of Emergency Planning Zones<sup>1</sup> (EPZs) for facilities other

<sup>1</sup> EPZs for power reactors are discussed in NUREG-0396; EPA 520/1-78-016, "Planning Basis for the Development of State and Local Government Radiological Emergency Response Plans in Support of Light Water Nuclear Power Plants," December 1978. The size of the EPZs for a nuclear power plant shall be determined in relation to local emergency response needs and capabilities as they are affected by such conditions as demography, topography, land characteristics, access routes, and jurisdictional boundaries. The size of the EPZs also may be determined on a case-by-case basis for gas-cooled nuclear reactors and for reactors with an

than power reactors and the degree to which compliance with the requirements of this section and sections II, III, IV, and V as necessary will be determined on a case-by-case basis.<sup>2</sup>

Notwithstanding the above paragraphs, in the case of an operating license authorizing only fuel loading and/or low power operations up to 5 percent of rated power, no NRC or FEMA review, findings, or determinations concerning the state of offsite emergency preparedness or the adequacy of and the capability to implement State and local offsite emergency plans, as defined in this Appendix, are required prior to the issuance of such a license.

(2) \* \* \*

d. A State should fully participate in the ingestion pathway portion of exercises at least once every six years. In States with more than one site, the State should rotate this participation from site to site.

e. Licensees shall enable any State or local Government located within the plume exposure pathway EPZ to participate in the licensee's drills when requested by such State or local Government.

f. Remedial exercises will be required if the emergency plan is not satisfactorily tested during the biennial exercise, such that NRC, in consultation with FEMA, cannot find reasonable assurance that adequate protective measures can be taken in the event of a radiological emergency. The extent of State and local participation in remedial exercises must be sufficient to show that appropriate corrective measures have been taken regarding the elements of the plan not properly tested in the previous exercises.

g. All training, including exercises, shall provide for formal critiques in order to identify weak or deficient areas that need correction. Any weaknesses or deficiencies that are identified shall be corrected.

h. The participation of State and local governments in an emergency exercise is not required to the extent that the applicant has identified those governments as refusing to participate further in emergency planning activities, pursuant to 10 CFR 50.479(c)(1). In such cases, an exercise shall be held with the applicant or licensee and such governmental entities as elect to participate in the emergency planning process.

PART 61—LICENSING REQUIREMENTS FOR LAND DISPOSAL OF RADIOACTIVE WASTE

■ 21. The authority citation for part 61 is revised to read as follows:

authorized power level less than 250 MW thermal. Generally, the plume exposure pathway EPZ for nuclear power plants with an authorized power level greater than 250 MW thermal shall consist of an area about 10 miles (16 km) in radius and the ingestion pathway EPZ shall consist of an area about 50 miles (80 km) in radius.

<sup>2</sup> Regulatory Guide 2.6 will be used as guidance for the acceptability of research and test reactor emergency response plans.

##### The Direct Final Rule Procedure

The FAA anticipates that this regulation will not result in adverse or negative comments, and, therefore, issues it as a direct final rule. The FAA has determined that this rule only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. There will be no further action by the FAA unless a written adverse or negative comment or a written notice of intent to submit an adverse or negative comment is received within the comment period. If the FAA receives, within the comment period, an adverse or negative comment, or written notice of intent to submit such a comment, a document withdrawing the direct final rule will be published in the **Federal Register**, and a notice of proposed rulemaking may be published with a new comment period.
